

QASEEM ELAHI

Senior Frontend Engineer

Email: qaseemelahi@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Experienced Web & Mobile Developer skilled in scaling applications to millions of users. Proficient in monorepo structures to unify codebases, reduce costs, and accelerate development across web and mobile platforms. Passionate about creating impactful solutions that enhance user experiences.

Work Experience

Senior Software Engineer

Ling

06/2024 - Present | Thailand

- **Cross-Platform Development:** Built and maintained mobile applications for Android and iOS using **React Native** and **Redux** on **Google Cloud Platform**, managing a **5M+ user base** across 12 countries, achieving a **35% reduction in app crashes**.
 - **Scalable Web Applications:** Developed high-performance web applications using **Next.js** and **Node.js**, improving scalability and server efficiency by **40%**.
 - **Cross-Functional Collaboration:** Partnered with **50+ cross-functional team members** to synchronize mobile, web, and backend releases within an agile environment.
 - **Comprehensive Testing:** Achieved **90% code coverage** with Jest, reducing post-deployment errors by **30%**.
 - **Continuous Improvement:** Spearheaded technology evaluations to increase development speed by **20%**, integrating tools like **React Query** and **Sentry**.
-

Senior Frontend Engineer

CodeClever

02/2022 - 05/2024

- **Mobile App Development:** Created a robust mobile app with **React Native** and **TypeScript**, achieving **1M+ downloads** and a **4.2-star rating**.
 - **User Engagement:** Led **Next.js** web development, incorporating social login and video upload features, enhancing user engagement by **30%**.
 - **Enhanced Navigation:** Integrated **HERE Maps** for optimized routing, increasing navigation efficiency by **25%**.
 - **Performance Optimization:** Directed a **Nuxt 3** project, reducing load times by **40%** and supporting **\$100k+ in transactions** through **Square** and **Stripe** payments.
-

Senior React Native Developer

The Web Jobs

07/2020 - 01/2022

- **AI Integration:** Integrated **AI technologies** for text and video editing, boosting user-generated content by **50%**.
 - **Robust Form Validation:** Utilized **Formik** and **React Hook Form** for validation in an international money transfer app, reducing input errors by **20%**.
 - **Cross-Border Payments:** Supported transactions across regions by integrating payment providers such as **Payvyne**, **TrustPayment**, **Rex Payment**, and **Zeepay**.
-

React & React Native Developer

Devsoul

05/2019 - 06/2020

- **Monorepo Development:** Established a monorepo for cross-platform development, achieving **30% faster development cycles** and consistent UI/UX across web and mobile.
- **Real-Time Communication:** Integrated **Agora** for group calls and messaging, enhancing engagement by **20%**.

- **Optimized Data Handling:** Leveraged **GraphQL** for efficient data fetching, reducing load times by **35%**.
-

Education

- **Microservices & Applications Development**
Technical University, Berlin, Germany
 - **Bachelor of Science in Software Engineering**
Gift University, Pakistan | CGPA: 3.5
Key Courses: Artificial Intelligence (AI), Machine Learning (ML)
-

Skills

- **Languages & Frameworks:** JavaScript, TypeScript, React, React Native, Node.js, Next.js, Nuxt.js, Redux, RTK, React Query
- **UI Libraries:** Material UI, Tailwind CSS, Ant Design
- **Backend & Database:** Firebase, Google Cloud, GraphQL, Express
- **Testing:** Jest, Enzyme, Cypress
- **Integrations:** HERE Maps, ZegoCloud, Agora (Audio & Video), Sockets
- **Payment Systems:** Stripe, Square, Payvyne, TrustPayment, Rex Payment, Zeepay
- **OAuth:** Social OAuth, OAuth2
- **Project Management:** GitHub, GitLab, Bitbucket, Jira, Linear, Notion, Trello
- **Mobile Development Tools:** Xcode, Android Studio
